Re: Fire at All-Fab Building Components Inc.-Stony Mountain, MB

A damaging fire on May 26, 2009, has destroyed our 19,000 sq ft I-Joist production facility in Stony Mountain, Manitoba. A quick response from local and surrounding fire crews made sure the blaze was contained to the main building and did not reach 3 outlying buildings located on the ten acre site.

Our pallet production building temporarily lost power, but this has been restored and we will continue to produce pallets and crates to fulfill our order commitments.

As a company, we are working hard to minimize the interruption in our business and will continue on "business as usual" as our current inventory levels should enable us to maintain the level of service our customers have come to know.

All employees affected by the fire will continue their employment with All-Fab Building Components Inc.

We would like to thank the staff, fire fighters, the RCMP and the Fire Commissioner's office for guaranteeing the safety of everyone involved.

Thank you for your time, understanding and patience as we work diligently to restore the rest of our Stony Mountain, MB facility.

If you have any questions, concerns or comments please feel free to contact Mr. Garry Roehr, General Manager and Partner at All-Fab Building Components Inc., (204) 661-8880 or email groehr@all-fab.com.

With highest regards,

Management and Staff of
All-Fab Building Components Inc.
